

Documentation for booking travel theme

Important Note:

Before beginning the installation process, please make sure you are using the latest version of WordPress and the Theme.

Theme Documentation:

Thank you for choosing Boking travel theme! This documentation covers the installation and the usage of the theme. We encourage you to read through this document and keep it handy for reference. If you have any questions about the theme, or need assistance with anything related to the theme, please feel free to post your questions on our support forum and our support team will be happy to assist you.

Congratulations!

You have chosen one of the most beautiful WordPress Theme created with love.

The main goal of the documentation is to provide guidance and walk-through to set up the theme for your website in an easy-to-follow manner, while also introducing you to some of the features of the theme. First, we'll make sure that everything is ready for the installation, then we'll set up the theme, and cover some initial configuration and customization options.

Getting started

Let's get started! First, make sure that you have all the necessary things required to install Booking Travel.

Theme Requirements

Make sure you have the latest version of WordPress installed, by checking the updates tab from your current WordPress dashboard.

If you haven't downloaded WordPress already, you can download it from the WordPress repository.

Although Booking Travel will work with 4.5 and above versions of WordPress, it is recommended to have the latest version of WordPress.

After you have the latest version of WordPress, download Booking Travel theme file, and save it somewhere handy on your computer, as you will be using it for the rest of the installation process.

Theme Installation

There are two methods to install Booking travel theme. You may either upload the zipped theme file using the WordPress theme installer (Recommended), or you can upload the unzipped theme folder via FTP (Advanced).

Method 1 (Recommended) : Install Using the WordPress Theme Installer

Log into your WordPress site and opens the Administration Panel.

Go to Appearance > Themes in the WordPress Dashboard

Click on the Add New button

Click on the Upload Theme

Select the Booking-travel.zip file from your computer and click upload.

Click Install Now

Method 2: Install Using File Transfer Protocol (FTP)

Unzip Booking-travel.zip file on your computer.

Login using FTP client to access your host web server.

Locate the wp-content folder in your WordPress install files.

Upload the un-zipped Business One Page folder into the: wp-content/themes folder.

For More Information about installing theme using FTP visit:

http://codex.wordpress.org/Using_Themes#Adding_New_Themes

Theme Activation

Log in to the WordPress Administration Panels.

Go to Appearance > Themes in the WordPress menu

Hover over the theme thumbnail and click the Activate Theme

Plugin Installation

To install a plugin in your WordPress admin panel and follow the following steps.

Navigate to Plugins > Add New

Search for the name of the plugin you wish to install which will return a list of potential plugins.

Click Details to read more about a plugin.

Click “Install Now” if you wish to install the plugin.

It may ask if you are sure, and you may proceed. The installation will commence once you confirm to proceed.

After the plugin is downloaded. Go to Plugins > Installed Plugins. Click “Activate Plugin” to make it available for use.

Helpful Tips

- We highly recommend to use Child Theme if you need to change the code of the theme. Do not change the codes in the files of the parent theme as all such changes will be lost when the theme is updated. For information about How to create a child theme visit [:https://codex.wordpress.org/Child_Themes](https://codex.wordpress.org/Child_Themes)
- Always keep BackUp of your theme before making any changes to the theme.
- If you get any problem in using the theme, you can do the following things:
 - Deactivate the plugins, sometime plugin conflict may cause issues with the theme. Please deactivate the unused plugins.
 - Replace latest modified code with the original code.
 - If the issue still pertains, feel free to contact our support forum.
